

Spain: Winning team

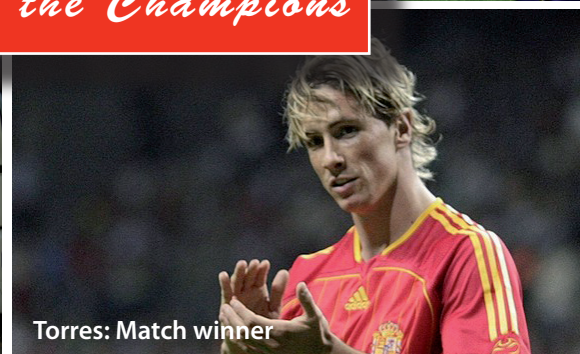

LDK 8300: New HD Slomo standard

*Greetings from the Champions*

SBA: UEFA's OB finalist

Torres: Match winner

Dear colleague,

We did it! Last Sunday-evening the final of UEFA Euro 2008 was played. The teams of Spain and Germany put down a great match and of course the LDK 8300 was there to cover it. Over 200 million fans watched the game and saw Spain win the Cup. Congratulations.

Never was a game captured in such a great way. 26 LDK 8000 family cameras captured every action. And no less then 7 LDK 8300s brought the most beautiful Slomo replays over the world. Our congratulations to Werner Reese and the whole SBA team and of course to the LDK 8300 team who created a star performer.

We've conquered Europe and now we're going for the world with about 50 LDK 8300s.

Beijing here we come!!!

Paul
