Product Description

25 Words

Canopus® ACEDV®io is an analog and DV editing card that is completely compatible with hundreds of video editing applications and all widely used video equipment.

50 Words

Completely compatible with hundreds of video editing applications and all widely used analog and digital video equipment, Canopus® ACEDV®io is an analog and DV editing card for Windows® or Mac OS® computers. Ideal for all editing environments, ACEDVio provides the broadest compatibility, longest product life and highest return on investment.

100 Words

Completely compatible with most video editing software and all widely used analog and digital video equipment, Canopus® ACEDV®io is an analog and DV editing card for Windows® or Mac OS® computers. ACEDVio features analog and DV input/output with native, open-standard OHCI support for popular video cameras and decks, supporting both NTSC and PAL. ACEDVio works with any OHCI compatible NLE including Grass Valley EDIUS®, Adobe® Premiere® Pro, Final Cut Pro and many others. At the heart of ACEDVio is the innovative Canopus DV codec chip providing the industry's best picture quality preservation and locked audio support during analog-to-DV conversion and capture.

Key Features

- Provides analog and DV input/output compatibility for leading editing and DVD authoring applications including Grass Valley EDIUS®, Final Cut Pro, Avid Xpress®, Adobe® Premiere® Pro, Vegas®, Avid Liquid™, Ulead® MediaStudio Pro, Windows® Movie Maker and more.
- Connects to all widely used analog and DV cameras and decks including VHS, S-VHS, Hi8, Digital8, DV and DVCAM (supporting NTSC and PAL video standards).
- Compatible with Windows® and Mac OS® computers
- Highest quality bidirectional analog/DV conversion with locked audio support
- Video output to a monitor or television while editing
- Adjustable brightness, contrast, saturation, hue and sharpness controls on analog video input
- 3-year limited warranty
